![STAR COMPLIANCE]

Data Warehouse Connector

Disrupt internal data silos and maximize your company's data potential.

Today's environment demands that data be at the epicenter of every business decision, yet it's often siloed across departments and enterprise systems, and quickly becomes stale as new data is created daily.

With StarCompliance Enterprise (STAR), compliance teams and business leadership can expand their data universe, co-mingling data from STAR with other organizational data for a more comprehensive view of employee activity. With unprecedented access to accurate, timely data, firms can improve operational efficiency, proactively identify risk, foster firmwide collaboration, and scale faster.

Key Benefits

→ **Compliance Effectiveness**
Gain a reliable, holistic view of risk across the business and act with confidence knowing you have the right data to support next steps.

→ **Firm-Wide Risk Mitigation**
Provide your three lines of defense with the right level of information to make informed decisions and support proactive risk mitigation.

→ **Minimize Human Error**
Remove the error-prone, human element from data collation and data merging, guaranteeing data accuracy and timeliness.

→ **Business-Wide Insights**
Join data sets from HR, finance, legal, compliance, training, and more, and provide valuable, actionable insights to business leaders.

→ **Regulatory Rigor**
Answer regulatory requests with speed and confidence knowing the data you're providing is accurate, inclusive, and timely.

Example Use Cases

→ **Data Housing**
In situations where STAR-created data needs to be housed within a company's own infrastructure, secure data sharing can be established in hours—not weeks.

→ **Intraday Reporting**
Utilize STAR-created data into downstream Business Intelligence (BI) tools (e.g. Tableau, Power Bi, etc.) to generate dashboards and build views with real-time data—updated every two hours.

→ **Dismantling Data Silos**
While the cross-departmental data combinations are endless, here are a few examples we see frequently:

STAR Data		Company Data
Gift and Entertainment Activities	+	Entertainment Budget by Internal Group
Employee Personal Trade Activity	+	Employee PII Data
Company/Employee Trade Transactions	+	Financial Research Publications
Employee Activity Violations	+	Employee Training Certifications
Employee Personal Trade Activity	+	Trading Desk Activity (firm and client)

About StarCompliance

StarCompliance is the world's leading provider of employee compliance technology solutions. Trusted for over 25 years by millions of users in 114 countries, StarCompliance Enterprise provides a user-friendly interface that delivers the data, technology, and actionable insights needed to proactively mitigate risk, monitor conflicts globally, and support complex whistleblowing regulations.
