

StarAssist

Turn complex compliance rule decisions into clear, explainable insights—instantly.

Understanding why a trade request was approved or denied can be difficult when multiple rules interact across complex scenarios. StarAssist brings clarity to this process by transforming rule logic into simple, conversational explanations—helping compliance teams quickly understand outcomes without manual interpretation. Built directly into StarCompliance Enterprise, StarAssist delivers consistent, explainable insights while maintaining strict governance and control—enabling firms to confidently adopt AI within regulated environments.

Why choose Star?

- **Explain complex decisions with clarity**
Instantly translate multi-layered rule evaluations into plain-language explanations, eliminating the need to interpret individual rule results.
- **Drive consistency across compliance teams**
Ensure every decision is explained in the same clear, standardized way—reducing ambiguity and improving confidence in responses.
- **Built for trusted AI adoption**
Operate within a governed, auditable framework where AI is explainable, controlled, and aligned to enterprise compliance and data policies.

Core Features That Drive Results:

> **Governed AI Within Compliance Workflows**

StarAssist is designed specifically for regulated environments, with built-in controls to manage access, enforce data boundaries, and maintain oversight. AI functionality is advisory-only, ensuring compliance teams remain in full control of decisions at all times.

> **AI-Powered Decision Explainability**

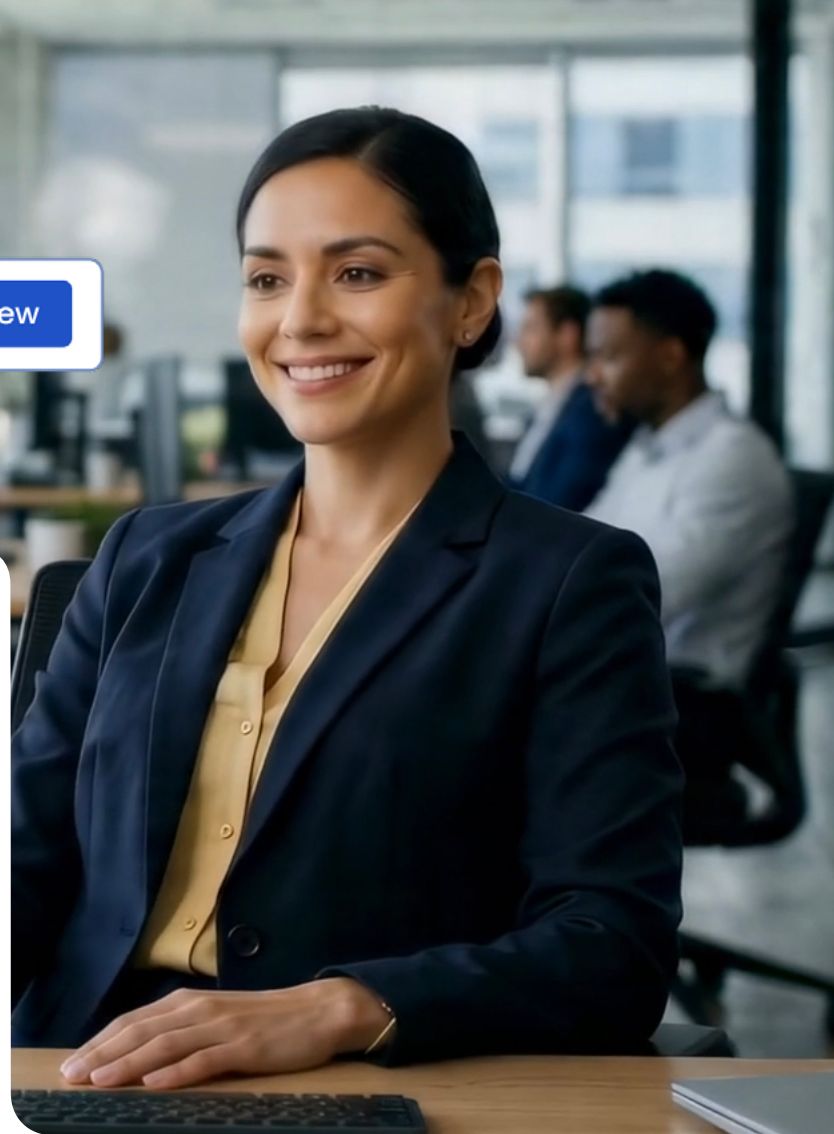

StarAssist consolidates complex rule outcomes into a single, concise explanation, showing which rules were triggered and how they contributed to the final decision. This eliminates the need to manually review and piece together multiple rule results, significantly reducing the time required to understand outcomes while improving accuracy and confidence.

> **Seamless Workflow Integration**

Embedded directly into pre-clearance workflows, StarAssist enables users to move from reviewing rule outputs to receiving a consolidated explanation in a single click—streamlining the process without changing underlying rules or configurations.

> **Consistent, Auditable Outputs**

Every explanation generated by StarAssist is grounded in configured rules and fully auditable. This ensures that explanations remain aligned with existing compliance frameworks while delivering consistent messaging across teams.

Faster Understanding, Stronger Oversight

StarAssist transforms how compliance teams understand and explain complex rule decisions. By delivering clear, consistent, and governed AI-driven insights, firms can reduce time spent interpreting outcomes while strengthening confidence, transparency, and control. It's a smarter, more trusted approach to explainability—built for the demands of modern compliance.
