

# Mobile App

**Increase employee participation.**  
**Increase data accuracy.**  
**Increase responsiveness.**

All the essential employee compliance functionality you count on from StarCompliance is now available whenever and wherever your employees need it—on an easy-to-use, native mobile app. With STAR Mobile, employees pre-clear activity and report transactions on-the-go. Supervisors review escalated requests anywhere there's a cell connection.

## Key Benefits

- **Boost Participation**  
An intuitive interface encourages greater employee engagement, improves data accuracy, and streamlines manager interactions.
- **Accelerate Response Times**  
Device-level notifications make it easy to prioritize tasks and stay on top of urgent matters.
- **Clear Trades on the Go**  
Employees can pre-clear trades and report gifts or entertainment, while supervisors handle any escalated requests.
- **Maintain Security**  
Adhering to top security protocols for networks and devices ensures safe data transfer and secure local storage.

### > **The Freedom To Pre-Clear — Anywhere**

Pre-clearance is at the heart of any modern compliance program, and STAR Mobile doesn't disappoint. Employees can use STAR Mobile to pre-clear personal investments and gifts and entertainment spending whenever they need to.

### > **Capture More Activity**

Once employees have executed a trade, they can report it through STAR Mobile the same as they would through the STAR desktop app. Employees can also view a complete listing of their existing transactions through STAR Mobile.

### > **Improve Response Times**

Supervisors can use STAR Mobile for the administrative and oversight functions vital to their jobs. When activity is flagged and escalated by the system, they can review it the same as they would sitting at their desks.

STAR Mobile also offers full question-and answer functionality and a history of previous reviews and reviewers.

### > **Stay Secure**

Optimized, on-the-go compliance functionality means optimized, on-the-go data security. The network offers secure data transport, utilizes best practice protocols for authentication and authorization, and supports Single Sign On (SSO). Equivalent best-practice protocols employed at device level mean secure local-device storage.

### > **Keep It Simple & Convenient**

The STAR Mobile home screen is intuitive, making it easy to get started and stay on top of high-priority tasks with device-level notifications. Existing STAR Platform roles and access seamlessly carry over, ensuring a unified experience. By making compliance effortless, STAR Mobile boosts employee participation and delivers a more accurate, up-to-date picture of activity across the firm. It also empowers managers to support their teams on the move.

### > **Control Access With Ease**

Manage the mobile app through any corporate device-management platform using the AppConfig framework, providing a consistent, no-custom-work way to deploy and secure it across fully managed devices. The app also supports Intune MAM for enforcing app-level policies around data protection, access, and conditional launch. Together, these options provide flexible control, reduce administrative overhead, and ensure strong protection of sensitive compliance data across any device model.

## **About StarCompliance**

StarCompliance is a leading provider of employee and firm compliance technology solutions. Trusted for over 25 years by millions of users in 120 countries, StarCompliance Enterprise provides a user-friendly interface that delivers the data, technology, and actionable insights needed to proactively mitigate risk, monitor conflicts globally, and support complex whistleblowing regulations.
